

Press Release

NASDAQ LAUNCHES BROAD RANGE OF CANADIAN CRUDE INDEX FUTURES

19 November 2018 – Enerdata, the independent energy information firm, has today announced the launch of CCI Canadian Crude Financial Futures contracts on Nasdaq Futures, Inc. (NFX).

These contracts are based on Enerdata's Canadian Consolidated Indices (CCI), which are consolidated from trades of the underlying physical Canadian Crude market. Marex Spectron and One Exchange, leading energy brokers, will contribute execution data to the indices in real-time, independent of NFX and Enerdata.

The NFX range of Canadian crude futures contracts includes:

NWC NFX (C.C.I.)	Western Canadian Select Crude Oil Basis Futures
NSP NFX (C.C.I.)	Canadian Synthetic Sweet Crude Oil Basis Futures
NSR NFX (C.C.I.)	Canadian Sour Crude Oil Basis Futures
NSW NFX (C.C.I.)	Canadian Light Sweet Crude Oil Basis Futures
NC5 NFX (C.C.I.)	Canadian Condensate (C5) Basis Futures

These futures contracts are demand driven, with market participants seeking to hedge the basis risk of a significant volume of barrels not covered by traditional contracts.

Kevin Kennedy, CEO of NFX added: "Adding the CCI Futures to the NFX energy product suite expands our North American crude oil portfolio into Canada, and, combined with the low cost NFX platform, can bring significant value to the Canadian crude oil trading and hedging community."

Ian Lowitt, CEO Marex Spectron added: "Having successfully launched CCI last year following demand from our clients, it has become an established industry benchmark for Canadian crude. Given the greater liquidity of the Enerdata indices, partnering with Nasdaq to offer futures contracts is the logical step forward."

Richard Zarzeczny, President of Canadian Enerdata, added: "The launch of the NFX CCI Futures contracts is a significant step forward for the Canadian crude oil industry. They offer market participants with extremely competitive risk management alternatives based on credible, independent, real time price benchmarks representing a significant portion of the Canadian crude oil market."

Perry Undseth, President of One Exchange, commented: One Exchange is excited to work with Nasdaq in delivering a new suite of products to the Canadian oil market. For some time, our clients have been asking for a solution to the fragmented benchmark for Canadian crude oil contracts. The CCI framework/methodology has addressed industry concerns by delivering a single benchmark through an independent publisher (Canadian Enerdata) who delivers the data in real-time. The launch of the NFX CCI financial contracts now allows eligible market participants to effectively hedge physical exposure against a single consolidated benchmark that is comprised of more than a single source of data.
